LANGUAGES

- JavaScript (ES6+)
- SQL (T-SQL)
- HTML5 / ASPX
- CSS3
- JSON / XSL (XSLT)
- C# (Basic)

FRAMEWORKS / LIBRARIES

- React.js
- Node.js
- Tailwind CSS / Bootstrap
- Kendo UI

DEVELOPMENT TOOLS

- VS Code / Visual Studio
- Git (GitKraken / GitHub)
- Vite

CLOUD & API INTEGRATION

- Firebase
- Netlify
- RESTful APIs

SUMMARY

Front-End Developer & Technical Leader with 10+ years of experience in SaaS environments. Specialized in building dynamic user interfaces using **React**, **JavaScript**, and **Vite**. Expert at bridging the gap between complex backend **SQL** data and front-end **UI** delivery. Proven ability to **collaborate cross-functionally** with design and engineering teams to **uphold industry-leading UX** standards. Proficient in **version control (GitKraken, GitHub)** and modern styling frameworks like **Tailwind CSS** and **Bootstrap**.

EXPERIENCE

Assistant Director of Support Engineers & Customer Solutions Engineer — **Jan 2023 - Present**

Standpoint Technologies

- **Front-End Development:** Engineered interactive checklists using **React** and **JSX**, successfully integrating new features into the production codebase through a standard Git-based version control workflow.
- **UI Modernization:** Managed and updated legacy front-end components using **XSL (XSLT)** and **ASPX**, while leading the transition to modern, interactive **React** components for internal checklist tools.
- **Backend Integration:** Maintained and extended **Node.js** server logic to support core system features, including a void payment module; integrated **SQL** queries to deliver accurate **JSON** responses across both legacy and modern front-end architectures.
- **Version Control:** Utilized **GitKraken** and **GitHub Desktop** to manage feature branches, execute merges, and push code updates to company repositories, ensuring seamless integration within the team's development workflow.
- **Full-Stack Integration:** Implemented a new AP Void Payment feature, developing the front-end interface and connecting it to C# backend services through RESTful APIs to streamline internal accounting workflows.
- **Documentation:** Authored comprehensive **SME (Subject Matter Expert)** docs in **Confluence**, standardizing technical processes for the support and quality assurance departments.

Sr. Support Engineer — **Jun 2016 - Jan 2023**

Standpoint Technologies

- **Database Management:** Built and executed complex **SQL** queries and stored procedures to identify system bugs and perform mass data migrations.
- **Collaboration:** Used **Atlassian products (Jira)** to manage the development lifecycle of bug fixes, ensuring clear communication between users and the dev team.
- **Web Styling:** Custom-coded **HTML** and **CSS** for client-facing email templates and system notifications.
- **Technical Troubleshooting:** Diagnosed and resolved complex SaaS issues for a global user base, utilizing **Jira** for bug tracking and documentation.
- **User Advocacy:** Acted as a bridge between end-users and the engineering team, translating customer pain points into actionable technical feedback.

EDUCATION

Sport Management (B.S.) — **Aug 2010 - May 2014**

Wingate University
